

What is claimed is:

1. A cover for a battery, the cover comprising mechanical features suitable for mating to a charging plug.
2. The cover of claim 1, wherein the cover comprises at least one main orifice, such that at least one power terminal disposed on the charging plug may electrically couple to at least one charging terminal disposed on the battery.
3. The cover of claim 2, wherein the cover comprises a base, a first side, a second side, a back, a latch and a belt.
4. The cover of claim 3, wherein the cover further comprises a latch mounted on the back, such that the latch facilitates deflection of the back in a cantilever fashion.
5. The cover of claim 4, wherein a first orifice is capable of mating to a charging plug having at least one hook.
6. The cover of claim 5, wherein the cover is made of a material selected from the group consisting of plastics, styrene, acrylic, polycarbonates, resins, and rubber.
